

GJ6.6 Fit System Characteristic

A summary of unique characteristics from the GJ6.6 system over fluorescent structures that have been previously standardized.

Fit System Characteristic	GJ6.6	G13	GZ16
1 Kg Load tolerance	X		
Rejects incompatible lamp types	X		X
Labels needed to warn of re-insertion of standard fluorescent lamps		X	
Provides ground connection	X		
Mechanical latch of lamp into lampholder for positive retention	X		
Allows connector voltages up to 350 volts	X		
Unique configurations for line voltage and low-voltage power feeds	X		
Lampholder has standard G13 mounting footprint	X	X	X
Provides consistent lamp/lampholder electrical connection polarity	X
